Novelty (N)	Claims	1-15	YES
	Claims		NO
Inventive step (IS)	Claims	1-15	YES

Industrial applicability (IA)	Claims	1-15	YES

2. Citations and explanations:

The subject matters of claims 1-15 appear to be novel and to involve an inventive step, since they are not described in any of the documents cited in the ISR. Particularly, an elastic wheel, wherein first engagement grooves extending in a circumferential direction are formed on mutually facing inside surfaces of ring pieces, second engagement grooves each opposite to each of said first engagement grooves as a pair and extending in a circumferential direction, and a damper member is supported at opposite ends in an axle direction by said first engagement groove and second engagement groove as a pair, is neither described in any of the documents nor could have been easily conceived of by a person skilled in the art.
